1. Summary:

This document describes the correct installation and operation methods of I5PT-390AHD4/10 Models.

1.1 Important Safety Notes:

Please read this manual carefully before installing and operating the camera.

- Please refer to the technical specs to confirm you are using a suitable power supply. Do not use power supply with higher/lower rating than specified.
- Do not attempt to disassemble the camera; in order to prevent electric shock, do not remove any screws or covers.
- There are no user-serviceable parts inside. Please contact the nearest service center if there is any technical failure.
- Avoid incorrect operation, shock vibration or heavy weight pressing which can damage the camera.
- Do not use corrosive detergent to clean the camera. If necessary, please use a soft dry cloth to wipe dirt. For tough contamination, use neutral detergent. Any cleanser for high grade furniture is applicable.
- Avoid aiming the camera directly towards extremely bright objects such as the sun, as it may permanently damage the image sensor.
- Please follow the installation instructions.
- Do not operate the camera in environments that exceeds the specified temperature, humidity or power.
- Keep away from any heat sources such as radiators, heat registers, stoves, etc.
- Do not expose the product to the direct airflow of an air conditioner.

4. Device Installation:

The camera is designed for a wall installation only! Please refer to the installation instructions below.

Important: The installation surface should be able to hold at least triple the weight of the assembled camera.

Step 1: Install the camera's bracket to the wall:

For cement wall:

1. Mark the holes locations on the wall.
2. Drill into the marked holes
3. Use the supplied screw anchors
4. Fix the bracket to the wall using the supplied screws.

For wood wall:

- 1) No need to drill the wall or use screw anchors.
- 2) Fix the bracket to the wall using the supplied screws.

Step 2: Install the camera:

- 1) Pass the camera's cable through the installed bracket.
- 2) Secure the camera to the bracket using the supplied screws.
- 3) Make all connections (Connect Power source last)

Step 3: Connect the camera to a controller:

- 1) Connect the camera to a controlling device such as RS-485 keyboard or DVR (By CoC/RS-485).
- 2) If required, adjust corresponding address and baud rate. Make sure you can control the device.

Warnings:

- 1) Do not adjust the camera's orientation manually. This might damage the device.
- 2) Do not hang anything from the camera's bracket as it is not designed to hold overloads.
